Reviews

Merely no terms to spell out. We have read through and i also am confident that i will gonna read yet again again in the future. You will not sense monotony at anytime of your own time (that's what catalogs are for about should you question me).

(Pasquale Larkin I)

AMERICAN AEROSPACE POWER: CHOOSING TO LEAD IN THE TWENTY-FIRST CENTURY - TOWARD 2035: SHIFTING GLOBAL COMPETITION, INCREASING THREATS, TIME FOR NEW CHOICES, A THIRD OFFSET STRATEGY NEEDED (PAPERBACK)

Independently Published, United States, 2019. Paperback. Condition: New. Language: English. Brand new Book. Rarely does a work of military strategy elevate its vision beyond merely military concerns. Rarer still are strategies that compel the wise engagement of our military with the broader polity they serve—the American people. The strategy you are about to read is this rare exception. American Aerospace Power: Choosing to Lead in the Twenty-First Century offers a compelling vision for sustaining the American way of life for the next hundred years. As challenges to world order and the American way of life appear around every corner, our instinct might be to ask, "What do we do now?" Wiser strategists, however, ask where have we been? Where have we historically gained our strength, preserved our advantage, and developed one of the most prosperous societies in the history of the world? This essay looks forward by first looking back, and it finds that America's strengths as an aerospace nation laid the foundation for our unmatched prosperity over the past 100 years. This is a story of civil-military partnerships at their finest, harnessing the innovation of industry, the insight of academia, the strength of the military, and the sweat equity of the American worker. Together, this aerospace nation propelled Charles Lindbergh across the Atlantic in 1927, rocketed Chuck Yeager through the sound barrier in 1947, landed Neil Armstrong on the moon in 1969, and hung the constellation of satellites that give communication, timing, and navigation to the entire world. As the authors make clear, American aerospace strength has been the fruit of toil matched with vision, not a birthright. The challenge for a new century is to reclaim our aerospace roots as a nation. As the pace of technological change accelerates, and with it the potential threats to our American way...
