

Performance and Economics of a Wind-Diesel Hybrid Energy System: Naval Air Landing Field, San Clemente Island, California (Paperback)

Ву-

Bibliogov, United States, 2012. Paperback. Condition: New. Language: English . Brand New Book
***** Print on Demand *****. This report provides an overview of the wind resource, economics and
operation of the recently installed wind turbines in conjunction with diesel power for the Naval Air
Landing Field (NALF), San Clemente Island (SCI), California Project. The primary goal of the SCI wind
power system is to operate with the existing diesel power plant and provide equivalent or better
power quality and system reliability than the existing diesel system. The wind system is also
intended to reduce, as far as possible, the use of diesel fuel and the inherent generation of
nitrogen-oxide emissions and other pollutants. The first two NM 225/30 225kW wind turbines were
installed and started shake-down operations on February 5, 1998. This report describes the initial
operational data gathered from February 1998 through January 199, as well as the SCI wind
resource and initial cost of energy provided by the wind turbines on SCI. In support of this
objective, several years of data on the wind resources of San Clemente Island were collected and
compared to historical data. The wind resource data were used as input to economic and
feasibility...

Reviews

An incredibly wonderful book with perfect and lucid explanations. It normally is not going to price a lot of. I am just very happy to tell you that this is the greatest pdf we have go through within my personal lifestyle and could be he finest book for at any time.

-- Bart I owe

This is basically the greatest pdf i actually have go through till now. It is definitely simplistic but surprises within the fifty percent in the ebook. I am easily will get a delight of studying a published ebook.

-- Hyman O'Conner III
